A Matter of Inconsistency.

We are rejoiced to have the oppor unity to recur to this subject-glad that the Times, in a genteel way, has afforded us this opportunity. There is no principle in the democratic uncompromising opposition to sump tuary legislation. Prombitory laws

be assured Grover Cleveland had Texas, never been president. If it were an

election simply upon the adoption of a measure of no political force or significance, we grant that a democrat chose and still not lose his identity as a true party man. We have maintained that up to this time prohibi-tion has only succeeded in states largely republican, and that party has en recruited from the republican party rather than the democratic party. In the south-in Georgia particularly—whenever the prohibi-tion and democratic forces confront each other, the prohibitionists must get their strength from the demoparty is all-powerful, the republican party is the opposition, and everything which throws a vote to them or strengthens them in any way, or subtracts one from the dem-ocracy, is a measure against the strength of democracy. If the prohi-bitionists did not aspire to elect presidents, governors, congressmen, sen-sters and state legislators, in other words, if it were entirely and truly non-political, was entirely and truly only only a moral or a religious mat-

could be supported by democrats.
But is not the entire history of its aims, purposes and enterprises, on the national or state field, altogether in favor of the political significance of illes. favor of the political significance of the move? Has St. John and Kansas been forgotten? Has St. John and last year, been forgotten? Gwernor Dorshelmer's paper is Rocky mountains into the sea with a certainly one of the truest and feather duster. staunchest papers, on every other proposition, in the country, and upon this whenever prohibition against democracy is an issue in New York he will be on the side of democracy beyond a doubt. Indeed, we have

seen a great number of briefer ar-ticles in the Star which show that upon this question he is fully as sound as upon all other great points of difference between the democracy The Houston Herald charges that Mr. Baker, president of the City bank, saved a \$75,000 mortgage by forclaing on \$250,000 worth of property, to the detriment of the smaller depositions. Can such things be? the truest democrats in this state who voted for prohibition this fall—we know there were hundreds in this county—who did not conceive that it was a political measure, who would never vote for it if it had a state or a county ticket in the field in direct

opposition to the democracy.

Of course this is a free country and a man has a perfect right to be either a republican or a democrat, but we contend that he can not be both and be consistent, and when prohibition confronts democracy, he can not vote with the probibitionist and still fairly claim to be a demis

There has been a good deal of to is understanding on this subject ever since the local option race last fall, and this is the first time a fair and fegitimate opportunity has been given to define on this point. Both Hovernor Coke and the Examinan have been charged with the purpose

Sul. Ross, posting on the muzzle of a contederate rifle, with his vote for whisky in Waco dangling at the gun's guard, will be a poor recommendation to that gentleman for the nemination of governor at the next convention in face of the ability and public record of his opponent, William Swaln.—Hieo Commercial.

We give the above as a specimen of the sort of attacks made upon General Ross in the interests of Swain. The funny part of all this is that the people in Texas have nearly all posed more or less on the muzzle of a confederate rifle, and the balance of them had very decided sympathies that way. As to the "vote on whisky,"

As to the "vote on whisky," we happen to know that it was one on principle alone, but if it had been but a vote-catcher, it was cast in the direction of the vast majority in Texas. Here in central and north anywhere. Now when there is a Texas, where Ross is so well known, democratic ticket in the field, either where his elevated, pure and unselfish where his elevated, pure and unselfish national, state or county, and there is character is so well known—been at the same time a prohibition tickets known for so long—it really seems also, under Governor Dorsheimer's that the profoundest depths of polit-rule, can a true democrat vote for ical idiocy have been reached by some prohibition and still be considered in of the Swain organs. This attack full fellowship with democracy? We will not very greatly harm General We had a national probibition ticket lions, but it is a hard one on "Wm. in the field in the last race, and had Swain," or else we sadly mistake the the prohibition democrats voted it, temper of the people of this part of

THERE is one thing about the failure of the City Bank of Louston which bath a fishy smack to it. The cause of the collapse is asserted to have been the sudden withdraws of the large deposits of the Central rail-road, and those of several other large depositors. This looks like collu-sion, and at the expense of the lesser depositors those least able to stand the loss. If this should prove to be true, and it ought to be boroughly investigated, somebody ought to go to state's prison over it. The protect tion of the rich at the expense of the poor, is a crime. In Europe such a failure would have gotten somebody into trouble.
